Sun, 09 Dec 2018 06:47:00 GMT aspects of lyme borreliosis pdf - Lyme disease, also known as Lyme borreliosis, is an infectious disease caused by a bacteria named Borrelia spread by ticks. The most common sign of infection is an expanding area of redness on the skin, known as erythema migrans, that appears at the site of the tick bite about a week after it occurred. The rash is typically neither itchy nor ... Sat, 08 Dec 2018 07:45:00 GMT Lyme disease - Wikipedia - Lyme disease, or borreliosis, is caused by spirochetal bacteria from the genus Borrelia, which has 52 known species. Three main species (Borrelia garinii, Borrelia afzelii, and Borrelia burgdorferi s.s.) are the main causative agents of the disease in humans, while a number of others have been implicated as possibly pathogenic.
